## Election/Restrictions

This application contains claims directed to the following patentably distinct species:

I. Species corresponding to Figs. 6A-11B, an embodiment of segmenting an input image based on projections of color values of the pixels of the image onto two-dimensional thresholding planes and identifying candidate redeye pixel areas based on the segmented pixels of the input image (the examiner believes that claims 1-16 are in this species).

II. Species corresponding to Fig. 12, a distinct embodiment of identifying candidate redeye pixel areas in an input image based on two redeye color models and merging the results into a set of candidate redeye pixel areas (the examiner believes that claims 17-27 are in this species).

III. Species corresponding to Figs. 14-18B, a distinct embodiment of projecting image data into a feature space spanned by multiple features to generate feature vectors respectively representing the candidate redeye pixel areas in the feature (the examiner believes that claims 28-51 are in this species).

IV. Species corresponding to Fig. 29, a distinct embodiment of segmenting glowing redeye pixel areas from non-glowing redeye pixel areas and re-coloring regions of the segmented glowing redeye pixel areas (the examiner believes that claims 52-59 are in this species).

The species are distinct because they have different mode of operations and different designs.

Application/Control Number: 10/653,019

Art Unit: 2624

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yuzhen Ge whose telephone number is 571-272 7636. The examiner can normally be reached on 7:30am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on 571-272-7453. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
